

PAWEŁ BRONIARCZYK

FRONTEND DEVELOPER

PROFILE

Frontend developer with 7+ years of experience who builds things on the internet for people to click on. When I'm not sitting in front of my computer, I enjoy board games and painting minis.

EXPERIENCE

EMPLOCITY | FRONTEND DEVELOPER

2017 — PRESENT

On a daily basis, I use React with TypeScript to create features for a company's applications or to create new ones for other clients.

I work in the SCRUM methodology, using Jira to manage project tasks together with other developers, designers, and project managers. We have developed a workflow consisting of automatic application deployment with Jenkins

PROJECTS:

Recruitment platform

Built with React, Apollo, and TypeScript, working closely with the client from MVP to production. Working on this project taught me to work on a constantly changing project, introducing new features while keeping the code maintainable.

Intelligent support tools for system users

An application that supports the completion of a formal application with hints to fields fetched with the help of Apollo. The entire process of registering the application, and at a later stage, its review, is managed by Redux.

Trading platform for sports clubs and sponsors

React application, during which I learned how to efficiently separate the service layer from the visual one.

Portfolio

A very simple portfolio website where I decided to try Next.js along with the Tailwind library. In addition, it is the first application that I have deployed with the help of Vercel. It is available online, though it doesn't have a proper domain.

EDUCATION

UNIVERSITY OF ECOLOGY AND MANAGEMENT

PRODUCTION MANAGEMENT & ENGINEERING

SKILLS

JavaScript	React	TypeScript	Webpack	Apollo
CSS	Sass	Redux	Git	GraphQL
HTML	NextJS
